GrantGPT is a custom AI assistant built specifically for nonprofit leaders that helps you write faster, stronger grant applications — without starting from scratch every time. You train it on your organization's real documents, stories, and data, and it drafts need statements, program descriptions, outcome sections, and more in your organization's voice.

🤖 GrantGPT Example (Horizons Miami):

See a fully built GrantGPT in action — powered by a fictional Miami nonprofit — so you can experience exactly what yours could do before you build it.

📋 GrantGPT System Prompt/Instructions:

The ready-to-copy instructions that turn any AI tool into your organization's personal grant writing assistant — just paste, upload your documents, and go.

📽️ GrantGPT Step-by-Step Video Demo:

A walkthrough showing you exactly how to set up your own GrantGPT from scratch, including how to build your knowledge base and which AI platform to use.
